NEW ROUTE ANNOUNCEMENT

Nonstop flights to Phoenix on Allegiant start in May

Starting May 26, Allegiant will take off for Phoenix twice weekly! This new nonstop is Allegiant's eighteenth in Asheville, and another sunny and exciting vacation destination easily accessible from AVL.

The flight is scheduled on Mondays and Fridays, giving travelers great weekend or week(s)-long itinerary options.

AIRPORT CONSTRUCTION UPDATES

CRANE IN OPERATION

Steel going up for new central energy plant

So. Much. Construction. And we've only just begun. The steel frame for the airport's new central energy plant (CEP) is being constructed. The CEP will house all HVAC equipment for the airport terminal in a centralized location, a major infrastructure upgrade needed in preparation for the construction of the new airport terminal.

NEW SOUTH SHUTTLE LOT UNDER CONSTRUCTION

More parking coming by fall

You may have noticed some tree removal that has occurred south of the airport (just south of the gas station and Dunkin'). We have begun clearing land for a new parking lot that will add about 600 spaces to help accommodate the major growth occurring at AVL. The lot is slated for completion by Thanksgiving.

FEBRUARY IS THE MONTH OF LOVE

We pawsitively love these pooches!

Our Paws for Passengers ambassadors and ambassadogs were at it again this year, providing some happy “Smooches from Pooches” on Valentine’s Day. Passengers and employees got in on the fun.

DO YOU NEED PERMISSION TO FLY YOUR DRONE?

Your drone questions answered

You can purchase a very basic drone for less than \$100, so they are more affordable than ever. Drone numbers are quickly rising; in fact, the Federal Aviation Administration (FAA) has 871,984 drones registered. “Registered?” you may ask, “I didn’t know you had to register a drone.” Flying a drone isn’t as simple as opening the box and taking off into the sky.

The FAA requires all drones over 0.55 pounds to be registered. This can easily be done by creating an account with the FAA’s Drone Zone. The FAA also requires that these drones

be labeled with the registration number. This can be done by engraving, permanent label, or permanent marker.

There are also other steps you need to take before flying your drone, and the first step is obtaining a certification.
